FEATURING KEN WILLIAMS

Opening Keynote at 8:00-9:15

Trena Wilkerson – Immediate Past-President of NCTM

Leading and Learning in Mathematics Education in Today’s Landscape: Opportunities Abound!

Arizona mathematics leaders are working diligently and innovatively to address current challenges in teaching and learning mathematics to ensure the greatest levels of success for all students. While these challenges can, at times, be overwhelming, I posit that we have a unique opportunity in today’s landscape to be build partnerships, engage teachers, administrators, and other stakeholders in critical conversations, and create opportunities to support students and teachers. How can we as leaders in mathematics education, advocate for high-quality mathematics for each and every student? Let’s identify both challenges and opportunities and then examine ways to be effective advocates.

Conference Presenter at 9:30-3:30

Ken Williams – Author, Speaker, Consultant, unfoldthesoul.com

Ruthless Equity: Disrupt the Status Quo and Ensure Learning for all Students

In this powerful status-quo-disrupting examination of the internal obstacles to ensuring high levels of learning for every student, bestselling author Ken Williams empowers educators with the tools to identify and defeat the enemy of equity. Participants will discover the many subtle and seductive forms this enemy takes, and the mindset and practices required to defeat it. This session will galvanize every educator to deliver on the promise of equity, excellence and achievement for ALL students, regardless of background.

Friday, February 10
